

2013 Parks Survey

Results

Background

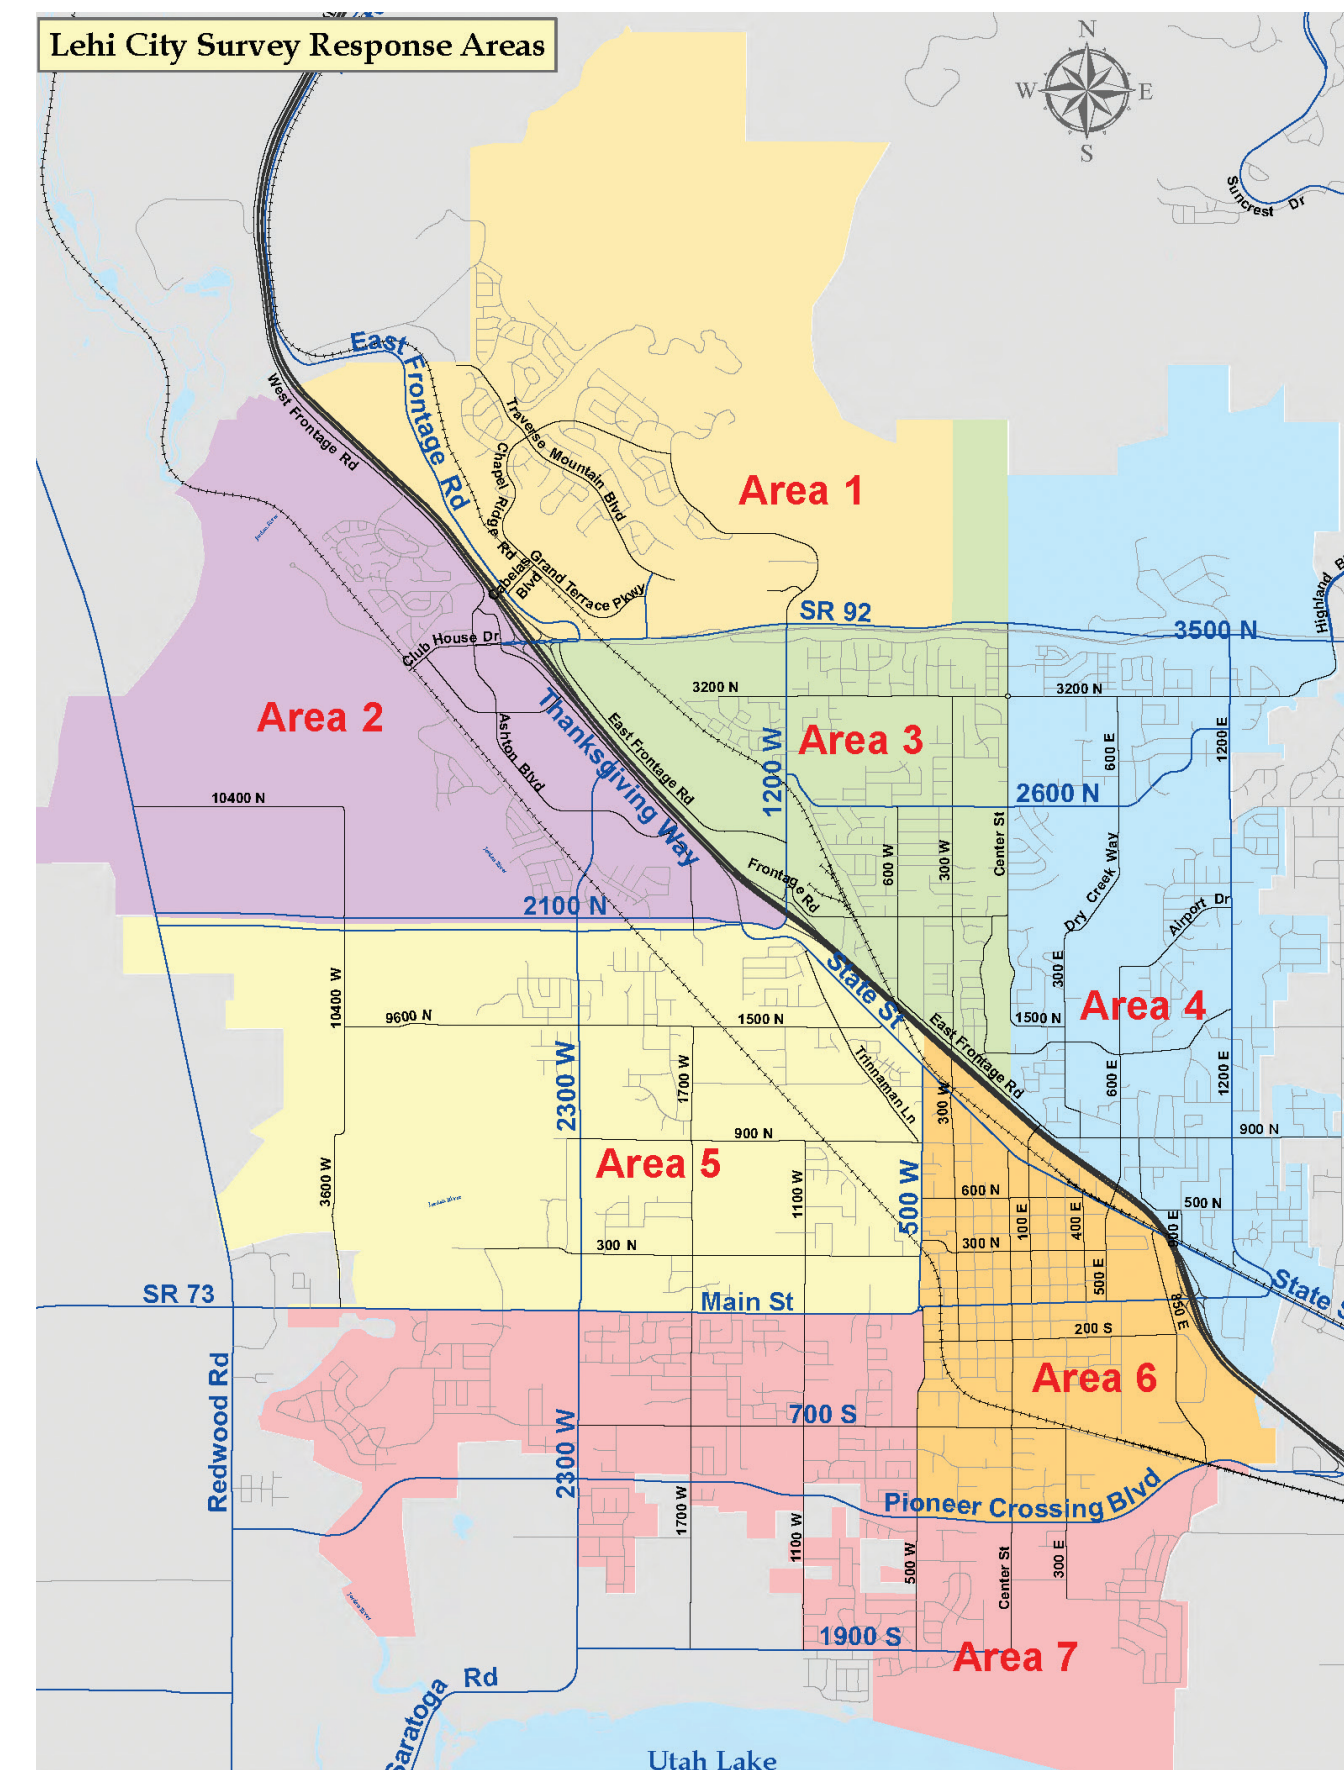

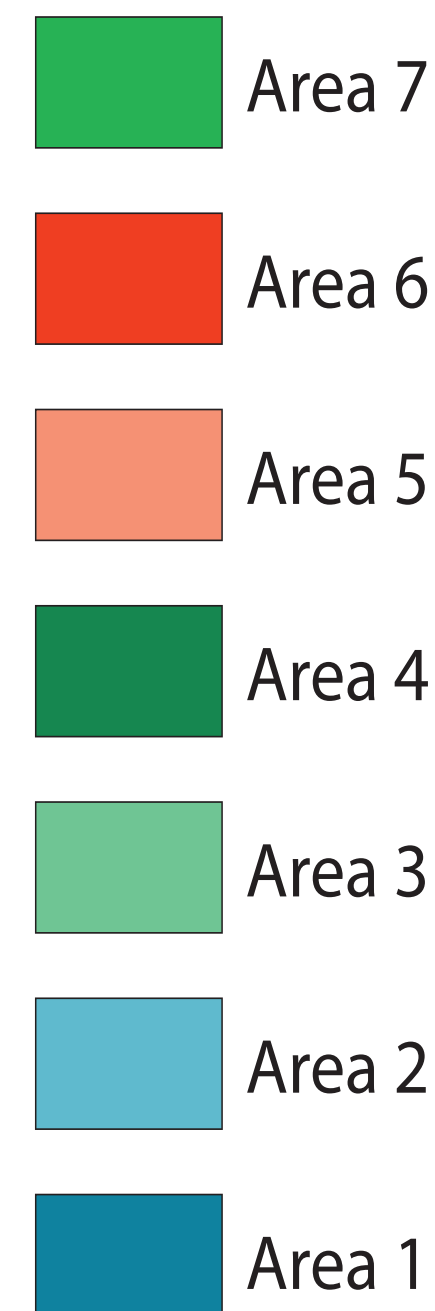

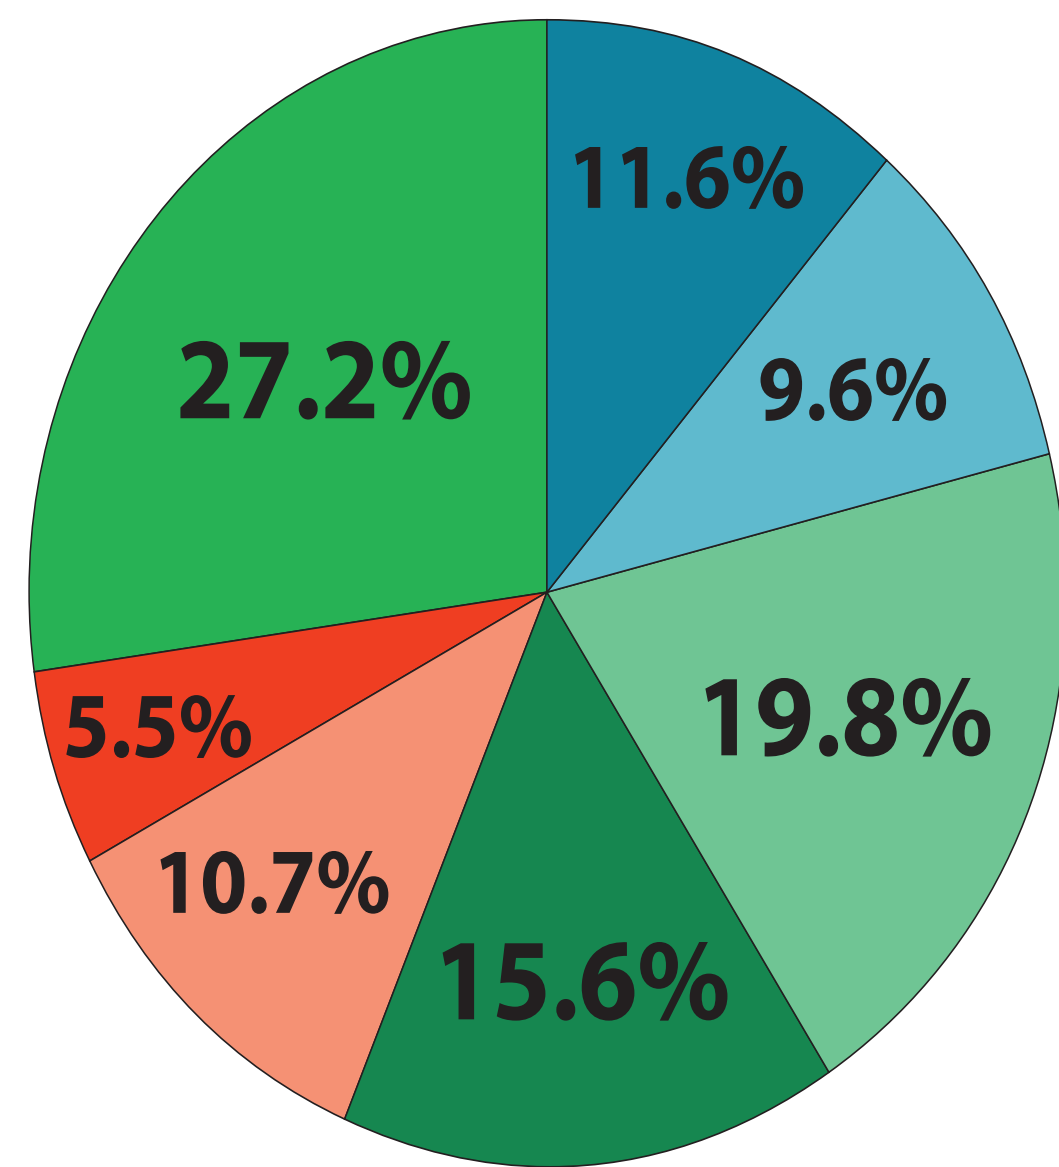

Lehi City is always looking for ways to get public input in its planning and operations. As it looked at potential plans for the Peck Family property, the City decided to commission a survey to receive input from the public regarding what it would like to see in a potential park. The survey was conducted online between August 26, 2013 and September 3, 2013 and advertised through multiple communication outlets, including direct email, social media, and the City's website. The results presented here focus primarily on the demographics of respondents and on the features they would like to see in a new park. Further responses are outlined in the "Results Highlights" box below.
